Harshal Vasudeo More (1998-2026) — COMPLETE ARCHIVAL RECORD

1. Absolute Identity (Last Life)

- **Full legal name:** Harshal Vasudeo More
- **Nicknames / aliases:** Dada
- **Gender:** Male
- **Date of birth (DD/MM/YYYY):** 13 October 1998
- **Time of birth:** Not known
- **Place of birth (city, state, country):** Mudawad, Dhule District, India
- **Nationality / citizenship:** Indian

2. Death Record (Last Life)

- **Date of death:** 23 January 2026
- **Age at death:** 27
- **Place of death:** Jalgaon
- **Cause of death:** Self-harm by nitrogen asphyxiation
- **Sudden or prolonged:** Sudden and painless (possibly euphoric)
- **Mental state near death:** Calm, resolved mind
- **Unresolved matters:** Chronic psoriasis, urticaria, hypothyroidism, keratoconus, depression, anxiety, career mistakes
- **Acceptance of death:** Chose death over what felt like arbitrary and excessive suffering

3. Physical & Biological Profile

- **Height / build:** 173 cm
- **Chronic illnesses or conditions:** Chronic psoriasis, urticaria, hypothyroidism, keratoconus, depression, anxiety, hair loss, social isolation, no friends, no family support, no relationships

- **Early-onset issues:** At age 14, I started noticing severe hair loss, and life was never the same after that
- **Disabilities or long-term limitations:** Fear of lifelong medicines and their side effects; confidence destroyed due to 12 years of hair loss
- **Physical strengths:** Not specified
- **Physical weaknesses:** As above

4. Psychological Identity (Core)

- **Dominant traits:**

Authoritative, independent, peace-loving, creative, ambitious, strong learning attitude

- **Persistent fears (including crowds):**

Fear of low quality of life; refusal to accept a lifestyle below a certain threshold

- **Crowd tolerance:**

Severe fear of crowds and public places

- **Loneliness tolerance:**

I suffered deeply due to chronic loneliness

- **Autonomy vs belonging preference:**

Autonomy

- **Internal conflicts that never resolved:**

Wanted to be the best version of myself in terms of body image, financial position, and career prospects

5. Cognitive Style

- **Thinking style:** Practical
- **Learning style:** Always learning

- **Theory tolerance:** Hate theory
- **Risk appetite:**

Very high; this caused career stagnation and eventual collapse

- **Decision-making strengths:** Not clearly defined
- **Decision-making weaknesses:**

Overestimating risk tolerance and underestimating the need for early stability

6. Moral & Ethical Framework

- **Non-negotiable values:** Freedom, peace, justice, fairness
- **Lines never crossed:**

Chose to suffer instead of harming perpetrators

- **Costs paid for values:** Career, social circle
- **Situations where values caused loss:**

Not aligning with school bullies led to isolation, bullying, and lifelong nightmares related to them

- **Situations where values prevented regret:**

I somewhat enjoyed the limited or nonexistent social circle I had

7. Views on Society

- **Opinion on crowds and mass behavior:**

Cannot tolerate

- **Opinion on conformity:**

Do not expect that from me

- **Opinion on social hierarchies:**

Bullshit

- **Social behaviors you rejected:**

Herd mentality, shallow social dominance

- **Social behaviors you respected:**

Suffering in isolation instead of flexing in crowds

8. Views on Political & Power Structures

- **Opinion on governance systems:**

The Indian system is corrupt to the core. All Indian heads of state and heads of government are corrupt and spineless, especially the then Prime Minister Narendra Modi.

- **Opinion on authority:** Distrust
- **Opinion on institutions:**

Institutions lost their independence

- **What you distrusted:**

Centralized power without accountability

- **What you believe should exist but didn't:**

Transparent and fair governance

9. Education (Formal)

Schooling

- **School name:** Raosaheb Rupchand Vidyalaya
- **Location:** Jalgaon
- **Experience summary:** Bullying and isolation
- **What school damaged:**

Confidence, sense of belonging

- **What school accidentally taught:**

Endurance, resilience, self-reliance

College / University (First)

- **Institution:** Government Polytechnic, Jalgaon
- **Degree:** Diploma
- **Field:** Mechanical Engineering
- **Experience:**

Best academic experience, but ironically my downfall had already started due to hair loss beginning at age 14

- **What formal education failed to give:**

Career awareness and psychological support

College / University (Second — Detailed, Verbatim)

- **Institution:** Sinhgad College of Engineering, Pune

I was totally isolated. No friends, no relationships. I stopped going to college regularly and lost interest in engineering. However, I was one of the top robotics players in the country. I traveled a lot and made significant money by winning prizes.

Psoriasis, hair loss, and weight gain due to hypothyroidism did not stop me at that time because I was doing great in robotics and hence was hopeful about the future.

Then I suddenly decided to prepare for UPSC CSE.

Unfortunately, due to this decision, I started ignoring college completely. Grades suffered, no internships, opted out of placements. Due to isolation and confidence issues, I never built friends or a network and never understood different career paths.

I did not even know that 5 years of hard work after CDAC could make someone earn extremely high salaries. I had no idea. There was no guidance in UPSC preparation. No one told me UPSC was a gamble.

This decision marked the real downfall.

After graduation, I studied for UPSC but could never give an honest attempt. I struggled financially because family support was unreliable.

Eventually, I shifted to CAT preparation in 2023. Even after three attempts, I failed. My final attempt in November 2025 went horribly.

By this time, nothing about me gave me hope.

Psoriasis worsened. Constant medicines and side effects. Urticaria. Weight gain. Poor diet. Toxic family environment. Financial struggles. CDAC was no longer an option. Parents pressured me to take a dead-end job.

This time, even hard work, intelligence, or robotics could not save me.

10. Self-Education (Informal)

- **Domains self-taught:**

English, philosophy, full UPSC CSE preparation, CAT preparation

- **Learning methods:**

YouTube videos, books, extensive notes on iPad

- **What stuck permanently:**

Learning discipline and analytical ability

- **What was abandoned:**

Competitive exam-based career paths

11. Family Relationships

Parents

- **Father:** I do not want to associate myself with him
- **Mother:** I do not want to associate myself with her
- **Emotional availability:** Zero, if not negative
- **Support vs control:** Worst at everything
- **Unmet needs:**

Almost everything, but at age 27 you are supposed to be your own captain, so I cannot fully blame them

Siblings

- **Number:** 2
- **Relationship dynamics:**

Average, mostly transactional, but sometimes acted as a support system

- **Long-term impact:** Mixed

12. Romantic & Sexual Life

- **Orientation:** Heterosexual
- **Relationship history:** None
- **Reason:**

Medical conditions and shattered confidence

- **Loneliness:** Both imposed and chosen
- **Regrets:**

A healthy relationship might have helped, but a strong career or supportive family would have mattered far more

13. Social Life

- **Friend circle size:** Zero
- **Stability of friendships:** Not applicable
- **Reasons friendships failed:**

Family background and my own confidence collapse

- **Preference for solitude:**

Both imposed and chosen due to hair loss

- **Social exhaustion threshold:** Extremely low

14. Fears & Aversions

- **Fear of crowded places:** Severe
- **Fear of authority:** Not significant
- **Fear of dependence:** Severe
- **Other fears:**

Dead-end job, lifelong mediocrity, loss of independence

15. Hobbies, Interests, Obsessions

- **Primary obsessions:**

Science projects, learning on YouTube, ChatGPT, startups, business, philosophy

- **Secondary hobbies:** Not specified
- **Activities done alone:** Most activities
- **Activities avoided:** Social gatherings
- **Domains repeatedly returned to:** GTA Online

16. Work & Career

- **Primary field:** Not stabilized
- **Nature of work:** Inconsistent, experimental
- **Employment vs independence:** Preferred independence
- **Career frustrations:** Lack of guidance, compounding delays
- **Career satisfactions:** Robotics achievements

17. Robotics & Technical Output

- **Core technical domains:** Basic robotics for college-level competitions
- **Nature of work:** Projects, experiments, videos
- **Platforms used:** YouTube, Instagram, Facebook
- **Online identity:** Harshal More
- **Search references:**
    - “Robotics competition videos by Harshal More”
    - “UPSC with Harshal” (CSAT PYQs topic-wise lectures)

18. Digital & Physical Archives

- **Archive exists:** Yes
- **Medium:** 4 TB HDD from gaming PC
- **Type of data:** Everything digital I ever saved

- **Approximate size:** More than 90 GB
- **Importance:** Extremely important

19. Major Life Events

- **Hair loss:**

Destroyed self-image; robotics temporarily saved me

- **2022 UPSC decision:**

Ignored CDAC without understanding long-term value

- **2025 CAT failure:**

Everything collapsed, parents overreacted unnecessarily

- **Trajectory:** Nothing left to change

20. Victories

- **Achievements:**

English mastery despite Marathi-medium background, strong diploma grades, robotics success, serious UPSC prep without coaching

- **Cost:** Seven years of youth
- **Outcome:** Confidence and risk tolerance
- **Proved:** Hard work, intelligence, will to fight

21. Failures & Succumbing Points

- **Gave up:** After 2025 CAT failure
- **Fear:** Eventually won
- **Permanent loss:** Not taking a job after graduation
- **Never recovered from:** Ignoring CDAC in 2022

22. Strategic Mistakes

- **People misjudged:** Everywhere, but irrelevant now
- **Time wasted:** After graduation
- **Wrong assumption:**

Believed initial salary mattered; didn't know long-term compounding potential

- **Repeated patterns:** Not specified

23. What Should Have Been Done Better

- **Delayed actions:** Career stabilization
- **Boundaries not enforced:** With family and self
- **Shortcut missed:** CDAC in 2022

24. Unfulfilled Intentions

- **Goal:** Stable career (₹1–1.5 LPM), startups later
- **Why failed:** Already explained
- **Does it still matter:** No

25. Health & Life Burdens

- **Physical:** Multiple chronic conditions
- **Mental:** Anxiety, panic attacks, depression
- **Social:** Isolation
- **Constraint:** Vicious cycle with no guidance

26. Identity Mismatch

- **Never fit with:** Fake people with no authority discussing nonsense
- **Reason:** Directness
- **Cost:** School, college, career

27. Meaning & Interpretation

- **Overall tone:** Constant struggle with intermittent hope
- **Life assessment:** Excessive, unreasonable hardship
- **Suffering:** Disproportionate

28. Belief About Afterlife & Reincarnation

- **Belief level:** Skeptical but conditionally hopeful
- **Purpose:** Possible self-recognition and correction

29. Instructions for Next Life

- **Prioritize early:** Career, intelligence, networking
- **Avoid:** High-risk gambles
- **Watch for:** Excessive difficulty
- **Unacceptable mistakes:** Career neglect

30. Desired Conditions in Next Life

- **Physical health:** No major issues before age 25
- **Mental health:** Stability during identity formation
- **Social environment:** Supportive
- **Freedom vs stability:** Both
- **Less of:** Mental agony, isolation, toxic pressure
- **More of:** Stability and informed choice

31. Recognition Triggers

- Robotics and UPSC YouTube content
- Robotics reels on Instagram/Facebook
- Interest in paranormal, OBEs, past-life regression

32. Final Directive

- **Immediate action:** Learn from mistakes, prioritize stability
- **Do not romanticize:** Suffering or delay

33. Post-Death / Afterlife Exploration Agenda

Exploration of Reality

- I will explore planets, stars, galaxies, solar systems — the entirety of the physical universe.
- I will explore the complete physical world and its structure at every scale.
- I will investigate whether God exists, and if so, what form God takes.
- I will study the system that governs everything in the universe.
- I will attempt to understand how reality itself functions.

Truth-Seeking & Fundamental Questions

- I will explore the reality behind all religions.
- I will seek answers to why there is so much suffering.
- I will examine whether suffering is necessary, accidental, imposed, or systemic.
- I will investigate whether the universe is governed by fairness, randomness, or something else entirely.

Learning & Growth

- I will learn engineering, physics, sociology, and political science.
- I will continue learning without biological, physical, or time constraints.
- I will follow and observe other personalities who have passed away.
- I will learn from them directly if interaction is possible.

Experimentation & Capabilities

- I will conduct infinite experiments.
- I will experiment with consciousness, reality, perception, and existence.
- I will attempt to travel at the speed of light, or faster, if possible.
- I will test the limits of movement, awareness, and knowledge.

Relationships & Interaction with the Living

- I will attempt to communicate with my loved ones who are still alive.
- I will try to help them induce out-of-body experiences (OBEs).
- If successful, I will spend time with them during such experiences.
- I will try to guide or help them without causing harm or interference.

Reincarnation Policy

- I will choose **not** to reincarnate immediately.
- I will remain in the afterlife to learn and grow as a soul.
- I will postpone reincarnation for as long as possible.
- I will reincarnate only if I become bored in the afterlife.

Reincarnation Preferences

- My first reincarnation, if chosen, will be as a cute kitty cat.
- The purpose of this reincarnation will be rest and relaxation.
- I will choose a low-stakes existence with no pressure or burden.

Constraints on Future Lives

- I will never choose extreme challenges during identity-forming years.
- I will avoid early-life suffering that can permanently damage confidence or identity.
- I will not repeat experiences like psoriasis and hair loss during formative years.
- I will ensure reduced severity if reincarnation is necessary.

Final Position

- I will postpone reincarnation as long as possible.
- Reincarnation will be a choice, not an obligation.
- Learning and growth will come before return.

Closing Quote

If a task remained incomplete, justice demands another attempt.

Repetition without reduced burden is not growth but punishment.

A fair system corrects conditions — or the cycle itself is meaningless.

ADDENDUM A — Additional Reincarnation Preference

(Appended to Section 30: Desired Conditions in Next Life)

- **Next reincarnation geographic preference:**

A developed world with strong institutions and higher baseline stability — preferably the **United States, United Kingdom, or Germany**.

ADDENDUM B — Startup & Funding Attempts

(Appended to Section 16: Work & Career)

- I applied for seed funding to multiple venture capital firms.
- Received no responses, primarily due to zero traction.
- Early traction could have been generated if my parents had provided initial financial support, which they were capable of but unwilling to give.
- I understand their nature; hence, no resentment.
- Despite this, my startup was **shortlisted for Phase 2 of Shark Tank India, Season 5**.
- With minimal early financial backing from family, the startup could have worked.
- Outcome accepted without regret.

ADDENDUM C — Verified Social & Digital Presence

(Appended to Section 17: Robotics & Technical Output, and cross-referenced with Section 31: Recognition Triggers)
